Weed Free Gravel Inspection Procedures

For Owners

[Alaska's Certified Weed-Free Gravel Program](#) is a voluntary inspection program administered by the Alaska Department of Natural Resources/Plant Materials Center and carried out on the Kenai Peninsula by the Kenai Soil & Water Conservation District. The purpose of the program is to increase the availability of weed-free products to land managers working in sensitive areas to prevent the spread of invasive weeds and protect fish and wildlife habitat.

***Please note inspections occur during the active plant growing and not during the winter months.**

1. Complete the application (PDF) (Word) with all information and email to kenaiswcd@gmail.com. Enter the KPB parcel ID# under "Legal Description." Please include a clear map of the site showing nearest streets, access point(s), and area(s) to be inspected.
2. Upon receiving the application and confirmation of land ownership, Kenai SWCD will send an invoice to the **email** provided on the form. The annual cost for inspection and certification will be \$500 per year. This includes 2-4 site visits during the season. If no email is available, you can drop a check at our office or mail it to the address above.
3. Once payment is received the requester will be contacted by our inspector. The inspector will confirm pit location, access ability and set a time for inspection.
4. The inspector will provide a report to the pit owner with further instructions or clearance. Final reports will be submitted to our state Department of Agriculture.
